DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of claims 14-65 in Paper No. 5 is acknowledged. The traversal is on the ground(s) that the adhesion coating composition is formulated for use with the transponders, and the transponders include the adhesion coating. This is not found persuasive because the specific adhesion coating cited in claim 1 is not particular to the proper function of the tamper-evident transponder. The Examiner will not search for only this particular chemical composition. The Examiner will; however, search for transponders using this particular chemical composition.

The requirement is still deemed proper and is therefore made FINAL.

Specification

2. The disclosure is objected to because of the following informalities:
- Page 4, Lines 10-30: Every instance of a drawing in multiple parts such as Figures 2A and 2B should be listed as such in the Brief Description of the Drawings.
 - Page, 24, Line 21: The second instance of the verb "is" is not needed.
 - Page 28, Line 30: The verb --be-- is needed after "can".
 - Page 29, Line 18: The label is listed here as No. 100; however, in the drawings the label is No. 900.

- Page 36, Line 14: There is no period at the end of this sentence.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter that the applicant regards as his invention.

4. Claims 51-53 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 51 recites the limitation "the adhesive" in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim 52 recites the limitation "the adhesive modifying coating material" in lines 4-5. There is insufficient antecedent basis for this limitation in the claim.

Claim 53 recites the limitation "the adhesion modifying coating" in lines 4-5. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2636

6. Claims 51 and 53 are rejected under 35 U.S.C. 102(b) as being anticipated by **Connolly et al** [U.S. 5,644,295].

For claims 51 and 53, the adhesion (No. 8) of the Connolly reference effects the destructibility of the security device by changing the adhesive properties between certain electronic components of the security device.

7. Claims 58 and 59 are rejected under 35 U.S.C. 102(b) as being anticipated by **Lauro et al** [U.S. 5,604,485].

For claim 58, Figures 1-3 of the Lauro reference depict several transponders onto a single substrate.

For claim 59, the transponders of Lauro operate at several different frequencies.

8. Claims 14-50, 52, 54-57, and 60-65 contain allowable subject matter.

9. The following is a statement of reasons for the indication of allowable subject matter:

The particular chemical composition and specific methods of applying said chemical composition is not to be found in the prior art when applied to a flexible tamper-indicating label.

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2636

Hunn et al [U.S. 3,671,721] depicts several transponders on a single substrate.

Yamada et al [U.S. 4,029,945] comprises a plurality of code storing mediums on one card.

Larsson [U.S. 4,752,680] shows an information carrier with several RF circuits.

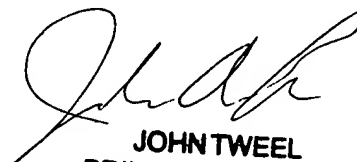

Gustafson [U.S. 6,050,622] teaches differentiating gluing for tamper indicating.
